1. Basic functions

easybill is an invoicing software that helps companies to organize their invoicing efficiently and professionally. The software makes it possible to quickly create and manage invoices, quotes and reminders. It offers numerous functions such as automatic invoice creation, connection to various accounting systems and online stores, as well as support for multiple languages and currencies.

In addition, easybill facilitates compliance with legal requirements through automated processes and regular updates. Another advantage is the cloud-based platform, which enables access to documents from anywhere.

5. Additional costs

In addition to our tariffs, you can select options that will be charged additionally.

5.1. Add-ons:

- Additional employee access: 5 euros per employee (available from the "Business" tariff)
- SEPA payment transactions: 0.19 euros per payment

5.2. Flex-Option:

The Flex option offers the advantage that you can also import data via the Import Manager beyond your booked limit without having to upgrade to a higher package. If the number of documents processed via the Import Manager exceeds the monthly limit booked, an additional charge of EUR 0.29 per document will be made.

Cost capping of the Flex option

The Flex option includes a cap on costs. If you exceed your package quota, the number of documents generated is calculated at the end of the billing period. Each document that has exceeded the quota is billed at €0.29, but only up to a fixed cost limit.

Here you will find an overview:

Total number of documents	Cost Capping the flex option
